BIOGRAPHY

I am a **second-year master** student at the Department of Electrical and System Engineering, **Washington University in St. Louis (Wash U)**, working under the supervision of **Dr. Ulugbek Kamilov**. My research goal is to develop fast, efficient, and interpretable algorithms for solving large-scale image problems. My recent work is focusing on parallel image reconstruction and large-scale optimization.

Research Interests: Computational Imaging, Parallel Image, Optimization, Deep Learning

EDUCATION

Washington University in St. Louis, St. Louis, MO M.S. in Electrical Engineering Advisor: Prof. Ulugbek Kamilov	Aug. 2020 – Expected 2022 GPA: 4.0/4.0
Nanjing Tech University, Nanjing, China B.S. in Electronic and Information Engineering Advisor: Prof. Yaping Bao	Sep. 2016 – Jun. 2020 GPA: 3.79/4.0
Soochow University, Suzhou, China Summer Research Assistant Advisor: Prof. Xinjian Chen	Jun. 2019 – Sep. 2019

AWARDS

- NJTECH U Outstanding Graduate (top 2%), 2020
- NJTECH U First-Class Scholarship (top 5%), 2016-2017, 2017-2018, 2018-2019

RESEARCH SUMMARY

- **Deep Learning for Computational Imaging (WashU CIG)**
 - Used deep learning for joint parallel image reconstruction and coil sensitivity calibration without using the ground-truth images [1].
- **Regularization by Denoising (RED) (WashU CIG)**
 - Proposed asynchronous parallel settings (with unbounded delay) where a cluster of processors is considered, which simultaneously implements stochastic gradients and block-coordinate decomposition to solve image Compressive Sensing problem.
- **Deep Learning for Medical Imaging Segmentation (Soochow U MIPAV Lab)**
 - First assisted in judging the types of retinal diseases in OCT images, and label the lesion areas and disease types for about 3,000 images.
 - Coded the data processing module for our own dataset.

- Coded the testing program for different baseline models to evaluate our performance.
